

Science Engineering Lab Report Template

1) Lab or Engineering Title and Date

- 2) State problem or question
- 3) Record procedure (5-6 steps max.) or parameters
- 4) Create data table to collect data for the experiment.
- 5) Graph data
- 6) Write conclusions:
 - A) Restate Problem or Question
 - B) What were your results?
 - C) What would you do differently if you did this experiment again?
 - D) What new questions developed during this experiment?
